Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
Claims 1, 2, 15, 16, 22, 25, 26, 36, 47, and 48 (Generic), drawn to monitoring bio-sensor and environmental data, classified in class 340, subclass 521.

Groupings:

- I. Claims 3, 4, 31-35, and 37-41, drawn to treatment criteria and treatment control, classified in class 600, subclass 1-15.
 - II. Claims 5-9, 12-14, 27-30, 52, and 54-57, drawn to warning messages, classified in class 340, subclass 7.51,7.52.
 - III. Claims 10, 11, 53, and 58, drawn to BREM - alerts, classified in class 340, subclass 539.12.
 - IV. Claims 17-20, 23, 24, and 49, drawn to RFID systems, classified in class 340, subclass 572.1-572.9.
 - V. Claims 21, 42-46, drawn to body monitoring networks, classified in class 343, subclass 718.
 - VI. Claims 50 and 51, drawn to classifying data according to tracking, classified in class 700, subclass 115-117.
2. The inventions are distinct, each from the other because of the following reasons:
Inventions monitoring bio-sensor and environmental data, treatment criteria and treatment control, warning messages, BREM – alerts, RFID systems, body monitoring networking systems, and classifying data according to tracking are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together

and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions require a prior art search in numerous classifications.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Stephen E. Bondura on July 16, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.
